

# COOKING EXTRUSION LINES

Your Partner for Food Products

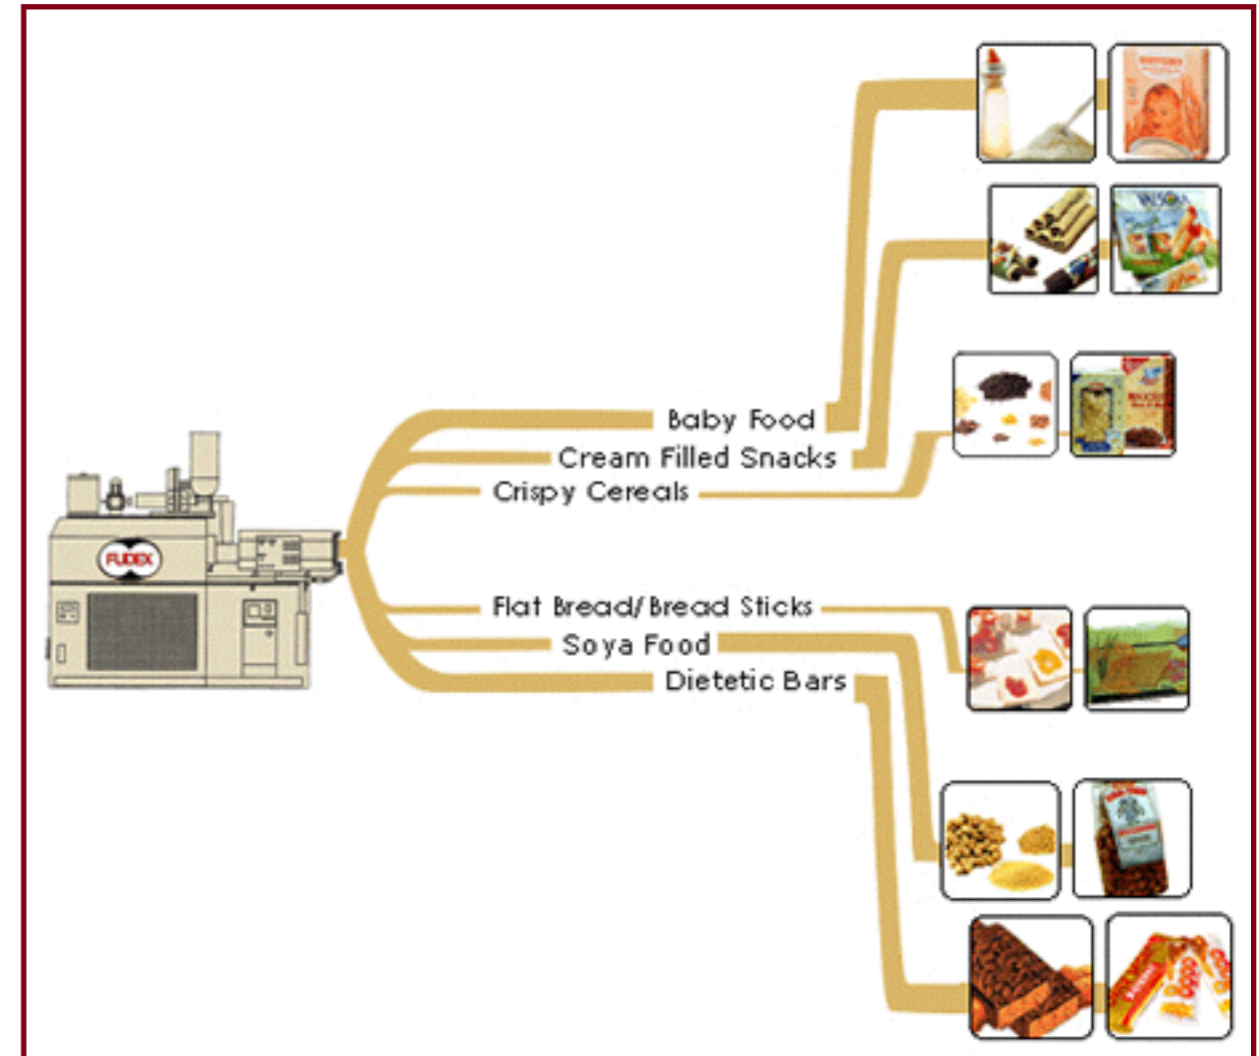

# Versatility of Fudex Technology

Fudex technology has reached an exceptional level of versatility in its twin-screw cooker-extruders.

---

By alternating the necessary accessory machines on the line, the same basic extruder can be used to produce extremely varied food product forms and recipes.

In this way it is possible for our customer to plan a wide range of foods which, with subsequent extensions to the basic plant, will be produced as and when required.

# Technology

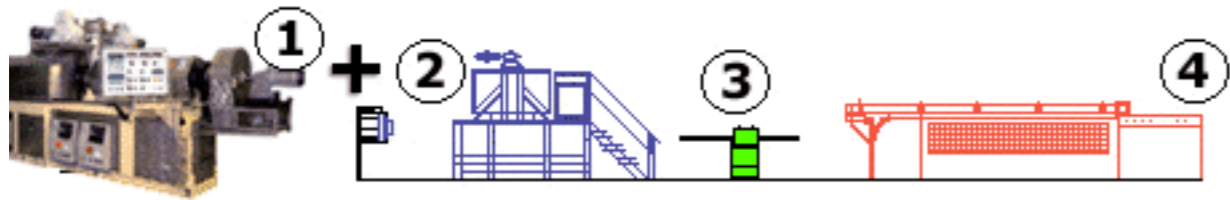

Cylinder and screws in high strength long-life stainless steel.  
Screws composed of interchangeable elements.  
Automatic cooling, if necessary, in the screw and cylinder area.

- Cemented, tempered and thrust bearings in strong gear box.
- Separate electrical panel pivoting coSKand and control panel on the extruder.
- Simple opening with cylinder slide and rack level for fast cleaning.
- Frontal equipment (head unit and rotating cutting station where present) set on pivoting arms.

MODEL	2FB60	2FB90	2FB105	2FB135
SCREW DIAMETER - SK	60	85	105	135
L/D RATIO MIN - MAX	12 - 30	12 - 30	12 - 25	12 - 20
MAIN MOTOR - KW	36	100	200	300
N. HEATING ZONES	4	6	8	10
MAX PRESSURE - BAR	250	200	200	150
CAPACITY - MAX Kg/h	70 - 200	200 - 600	300 - 1000	800 - 2500

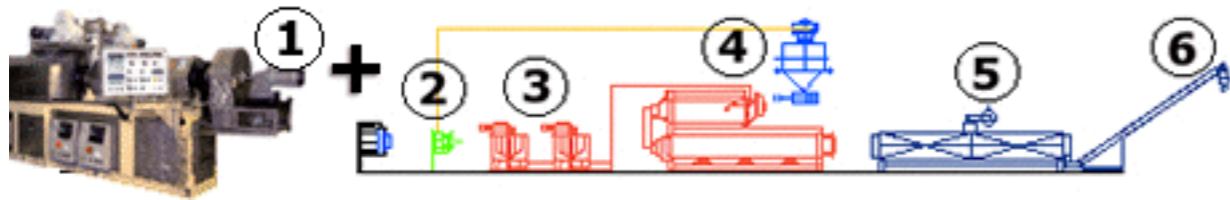

# Cream Filled & Snacks Line

1. Fudex twin screw cooker-extruder
2. Coextrusion station
3. Horizontal cutting machine
4. Automatic charger for cream-filled snacks

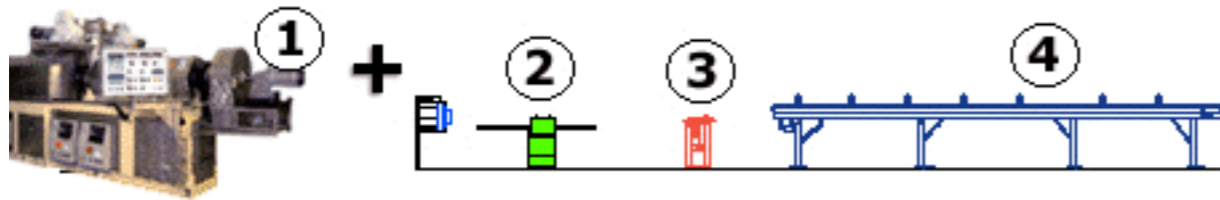

# Crispy Cereals Line

1. Fudex twin screw cooker-extruder
2. Rotative cutting station
3. Coating cream preparation tanks
4. Weight doser, coating drum and drier
5. Cooling station
6. Conveyor

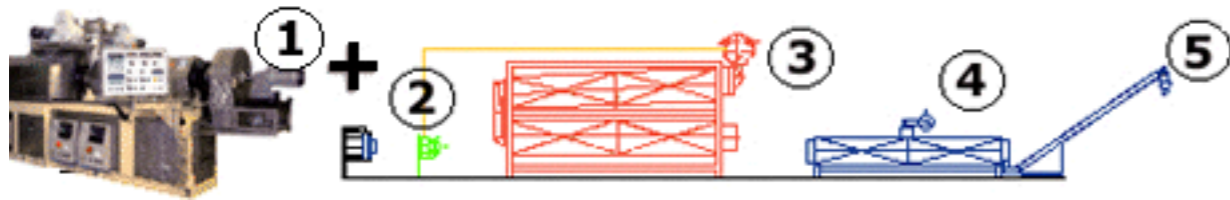

# Flat Bread & Bread Sticks Line

1. Fudex twin screw cooker-extruder
2. Horizontal cutting machine
3. Staker device
4. Automatic tray line

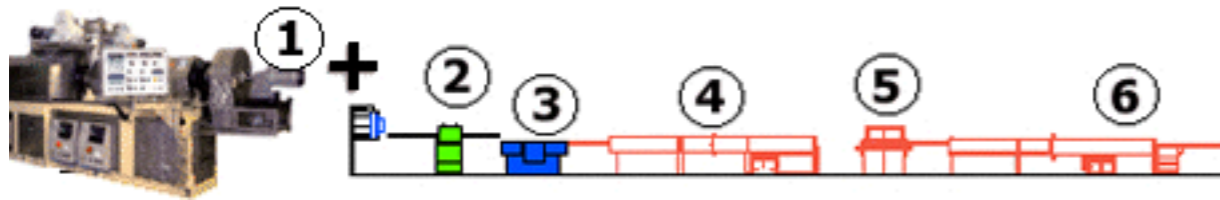

# Soya Food Line

1. Fudex twin screw cooker-extruder
2. Rotative cutting station
3. Rotative driers
4. Cooling station
5. Conveyor

# Dietetic Bars Line

1. Fudex twin screw cooker-extruder
2. Horizontal cutting machine
3. Cyclic deviator
4. Cooling tunnel
5. Chocolate coating station
6. Cooling Tunnel n° 2
